

Blinkit Analysis

Power BI Dashboard | Sales & Business Performance Analysis

Business Requirement

The objective of this project is to conduct a comprehensive analysis of **Blinkit's sales performance, customer satisfaction, and inventory distribution** to identify key insights and opportunities for optimization using relevant KPIs and visualizations in Power BI.

KPI Requirements

KPI	Definition
1. Total Sales	The overall revenue generated from all items sold.
2. Average Sales	The average revenue generated per sale.
3. Number of Items	The total count of different items sold.
4. Average Rating	The average customer rating for the items sold.

Granular Requirements

1. Total Sales by Fat Content

Objective: Analyze the impact of fat content on total sales.

Additional KPI Metrics: Assess how **Average Sales, Number of Items, and Average Rating** vary with fat content.

2. Total Sales by Item Type

Objective: Identify the performance of different item types in terms of total sales.

Additional KPI Metrics: Assess how **Average Sales, Number of Items, and Average Rating** vary across different item types.

3. Fat Content by Outlet for Total Sales

Objective: Compare total sales across different outlets, segmented by fat content.

Additional KPI Metrics: Assess how **Average Sales, Number of Items, and Average Rating** vary with fat content across outlets.

4. Total Sales by Outlet Establishment

Objective: Evaluate how the age and type of outlet establishment influence total sales.

Blinkit Analysis

Business Requirement — Chart Requirements

Chart Requirements

5. Percentage of Sales by Outlet Size

Objective: Analyze the relationship between **outlet size** and **total sales**.

6. Sales by Outlet Location

Objective: Assess the geographic distribution of sales across different outlet locations.

7. All Metrics by Outlet Type

Objective: Provide a comprehensive view of all key metrics broken down by different outlet types.

Key Metrics: Total Sales, Average Sales, Number of Items, Average Rating.

Dashboard Analysis Framework

Analysis Dimension	Key Metrics
Fat Content	Total Sales, Average Sales, Number of Items, Average Rating
Item Type	Total Sales, Average Sales, Number of Items, Average Rating
Outlet	Total Sales, Average Sales, Number of Items, Average Rating
Outlet Establishment	Total Sales
Outlet Size	Percentage of Sales
Outlet Location	Sales Distribution
Outlet Type	All Key Metrics

Purpose: Transform grocery sales data into a structured, business-focused Power BI reporting solution that supports performance evaluation and data-driven decision-making.
